MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. VIII

OTTAWA, AUGUST, 1933

No. 8

DOMINION STATISTICIAN: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.
CHIEF, BRANCH OF GENERAL STATISTICS: S. A. CUDMORE, M.A., F.S.S.
ASSISTANT ON BUSINESS STATISTICS: SYDNEY B. SMITH, M.A.

THE BUSINESS SITUATION IN CANADA

The economic improvement in Canada during the second quarter was continued during the first half of July, and the major factors for the month compared favourably with June. The gains recorded in business operations and in the price level of commodities, were especially significant in determining the upward trend of economic conditions.

Despite recession in speculative commodities during the latter part of the month, the official index averaged more than 4 p.c. higher in July than in June. With the exception of the iron and steel group gains were general in the eight groups of the component material classification. The widest fluctuation occurred in grain prices, the index for vegetable or crop products being 69.8 compared with 61.7. The contract grade of wheat averaged 83.4 cents per bushel in July compared with 66.8 in the preceding month, and the price of oats was 39.7 cents per bushel compared with 29.0.

The index of common stock prices was 83.3 in July compared with 74.7 in the preceding month. Each of the groups in the official classification averaged higher in July, despite the reaction in the latter part of the month. The index of mining stocks was 106.9 compared with 104.1 in June, moderate gains being recorded in gold, copper and silver stocks. The highest point was reached in the week ended July 20, reaction being shown in the weeks ended July 27 and August 3.

Prices of high-grade bonds were firm during the month, the yield on Ontario government obligations being 4.63 p.c. compared with 4.65 in June. The change in Dominion government bonds was of a moderate character.

Current loans showed a gain at the end of June reversing the trend of the last three years. Demand deposits recorded a considerable gain, while notice deposits showed slight recession. The surplus of notice deposits over current loans was \$487,000,000, the percentage of current loans to notice deposits being 64.9 p.c. Investment holdings, at \$860,000,000 compared with \$836,000,000 at the end of May, reached a new high point.

Business Operations

The marked recovery in business operations characteristic of the four preceding months was continued in July. The steel, lumber, construction and power industries enjoyed considerably greater activity, while the improvement in external trade was substantial. The index of the physical volume of business was 84.1 compared with 82.2 in the preceding month.

The indicators showing the trend of mineral production were reactionary. Exports of nickel while still at a high level showed moderate decline after seasonal adjustment, the amount being 10,501,100 pounds compared with 10,503,500 in June. The exports of copper ore and blister were at a lower level than in the preceding month. Zinc exports were 10,970,300 pounds compared with 16,819,900. Receipts of gold at the Mint from Canadian mines were 185,599 ounces compared with 210,796 and exports were reported as 147,621 ounces compared with 175,179. Silver shipments were 936,609 ounces compared with 1,136,000. Exports of asbestos of better grades were 6,259 tons compared with 12,134, while bauxite imports for the manufacture of aluminium were 4,799,600 pounds compared with 11,964,600.

The index of mineral production was 78.3 in July compared with 95.0 in the preceding month.

MONTHLY REVIEW OF BUSINESS STATISTICS

The decline in wheat flour production was less than normal for the season, the output in the latest month for which statistics are available being 1,186,000 barrels. The gain in rolled oats production was slightly less than normal for the season, while production of oatmeal and corn flour showed decline. Sugar production was 57,332,000 pounds, compared with 89,254,000 in the preceding period. Gains were shown in cattle and hog slaughtering after seasonal adjustment, the totals in July being 88,135 and 191,464, respectively. The gain in sheep and lamb slaughtering was less than normal for the season. Cheese and canned salmon exports showed considerable decline after seasonal adjustment, the increase in cheese shipments being considerably less than normal for the season.

The index of tobacco releases was 120.9 compared with 131.5. Release of cigarettes was 449,785,000 compared with 437,535,000, but the increase was less than normal for the season. A gain was recorded in the release of cigars, while raw leaf showed a decline. Crude rubber imports were 2,670,000 pounds compared with 3,328,000. The leather boot and shoe industry operated at a high level, production being 1,784,000 pairs in the latest month for which statistics are available.

Imports of raw cotton were 9,790,000 pounds compared with 7,440,000, a gain of 36.5 p.c. after seasonal adjustment. A gain was also shown in the imports of cotton yarn, while receipts of raw wool and wool yarn showed a decline.

The paper and lumber industries showed important gains, the output of newsprint being 180,387 tons compared with 171,419. Wood-pulp exports were 130,211,200 pounds compared with 104,340,800. Greater activity in the lumber industry was indicated by exports of 116,179,000 feet of planks and boards compared with 94,700,000. A gain was also shown in the exports of shingles. The index of the wood and paper group was 87.0 compared with 79.2.

The primary iron and steel industry was more active, steel ingot production being 49,076 tons compared with 31,602, while the output of pig iron was 31,689 tons compared with 857. The decline in motor car production was less than normal for the season, the output being 6,540 units compared with 7,323. Imports of crude petroleum were 118,271,000 gallons compared with 121,121,000 in June. The decline was less than normal for the season, the adjusted index being 219.0 compared with 186.5.

The construction industry obtained considerable new business in July, contract awards being \$12,651,600, compared with \$3,086,200. Building permits in 61 cities however, showed a decline, the total of \$2,082,000 comparing with \$3,536,000.

The average daily output of electric energy was 46,537,000 k.w.h. compared with 45,697,000, the gain being substantial in Quebec and Ontario. The electric power index moved up from 149.0 in June to 161.5 in the month under review. The decline in loadings was greater than normal for the season, the total being 162,728 compared with 175,954.

Contrary to seasonal tendencies, external trade was more active, exports being \$51,866,000 compared with \$46,472,000.

The higher level of bank debits was primarily due to greater speculative activity at Toronto and Winnipeg, the total being \$3,528,000,000 compared with \$2,982,000,000.

Crop marketings based on receipts of grain at Lakehead and Pacific coast ports were at a considerably lower level than in June, the index being 148.5 compared with 252.5. The index of cold storage holdings was 114.2 on August 1 compared with 114.5 on July 1.

Three Representative Factors

Economic expansion in progress during the second quarter, continued during the greater part of July. Business operations were at a higher level in July than in the preceding month, the index of the physical volume of business showing a gain of more than 2 p.c. The business index was only 2.99 times the standard deviation below the line of long-term trend compared with 3.35 times below in June. While substantial resumption of operations has taken place in the last four months, the present level is still far below computed normal. The recovery in common stock prices from April to July reflecting the greater confidence of speculators, was of a

very pronounced character. The index was 1.88 times the standard deviation below the line of long-term trend compared with 2.90 times in March and 2.13 times in June. The price of government bonds continued firm during the month under review.

Post-War Course of Production

A chart showing the trend of production from 1919 to the present is shown on page 10. It is clear that the manufacture of producers' goods normally fluctuates more widely than the manufacture of goods designed for direct consumption. The disparity has been especially pronounced during the last thirty months. The lowest point in the production of consumers' goods was reached in February, while the minimum for producers' goods occurred in April. While considerable recession has been shown in the output of consumers' goods from the maximum levels of 1929, a much greater decline was shown in producers' goods. The output of producers' goods was less in the first four months of the present year than during any similar period in the post-war period.

The inactivity in the production of durable goods was one of the essential factors of the depression, and continued recovery in such industries as lumber, iron and steel and construction would be a major contribution to the general economic situation.

Industrial Production in Principal Countries

The chart on page 15 shows the trend of industrial production in five important countries. The indexes are official, but have been recomputed on the 1928 base by the staff of the League of Nations. A composite of the indexes for the five countries indicates that considerable improvement has been effected since July, 1932, when the lowest point of the depression was reached. Business recovery has been under way for almost a year in most of the important industrial countries. The industrial production of France has been rising since July of last year, while the lowest point for Germany was reached one month later. In the United States the low point of last year was in July and that of this year in March. The increase in June from the first low point was 53.3 p.c. and from the second one about 48 p.c. The minimum for Canada was recorded in February of the present year, consecutive gains of substantial proportions being shown to the latest month for which statistics are available.

The course of the depression and of the beginnings of recovery have followed closely similar patterns in the five countries despite the widely differing policies of their governments.

Economic Ratios

Five economic ratios illustrating monthly developments in Canada from 1926 to the present are shown in the chart appearing on page 30. Of these the relationship between the physical volume of business and wholesale prices occupies a foremost position. The lowest point for each of these latter factors during the period of observation was reached in February of this year. Since that time a sharp rebound has been recorded, indicating a recovery in economic conditions. The gain in the business index from February to July was 25.5 p.c., while the price index recorded a gain of 11 p.c.

The lowest point in external trade was recorded in April, even after seasonal adjustment the minimum in recent years being reached in that month. Imports were slightly greater than exports in April, but the expansion in exports since that time has been greater than in imports, and a considerable export surplus has consequently been established in the elapsed portion of the present fiscal year.

Notice deposits during the present year have been relatively well maintained at a level somewhat higher than in the same period of 1932, the total at the end of June being \$1,387,000,000. The trend of current loans continued downward during the first part of 1933, a moderate gain being shown during June. The surplus of notice deposits over current loans was \$487,000,000 on June 30, current loans being 64.9 p.c. of deposits of this description.

Owing mainly to the gain in demand deposits the sum of the two principal classes of deposits showed moderate gain during the first half of 1932. Subsequent to April, the total debts to individual accounts owing mainly to speculative activity, showed sharp gains. The total for July was \$3,528,000,000, the greatest amount in payments by cheque since October, 1930.

A temporary maximum for high-grade bond prices was reached about the middle of 1931, a sharp reaction being shown during the next six months. From a low point in January, 1932, bond prices have gradually recovered. The rise in common stock prices from April to July counterbalanced the decline since May, 1931. Regarding 1926 as the base equalling 100, the index of common stock prices was higher than that of bond prices from the latter part of 1926 to March, 1931. Since that date, the index of bond prices has been higher than that of stock prices.

Conditions in the United States

Despite the economic reaction occurring about the middle of the month, business operations in the United States were at a higher level in July than in the preceding month. The gain was due to the continued expansion in industrial operations during the first half of July. During the second half of the month this expansion was not only checked but activity in some important lines declined appreciably. Steel ingot production advanced about 28 p.c. during July, the estimated rate of output being the highest for any month in three years. Pig iron production increased from 42,000 tons daily in June to almost 59,000 tons daily in July. Production of zinc was 30,905 tons compared with 24,027, and stocks declined about 12 p.c. Construction contracts awards were \$82,700,000 compared with \$103,000,000 in June. Car-loadings amounted to 3,109,000 compared with 2,265,000. Loadings of all classes of freight, except live stock participated in this average improvement, the largest gains being reported for coal, grains, ore and miscellaneous freight. Electric output averaged about 4 p.c. higher than in the preceding month.

Wholesale prices averaged higher in July than in June, a sharp decline in the latter part of the month almost offsetting the earlier gains. The prices of such commodities as petroleum, gasoline, copper, lead, zinc, pig iron, finished steel, steel scrap, hides and wool were among those which continued to advance. A further advance in stock prices during the first part of July was followed by a violent reaction, which reduced average prices by about 21 p.c. in the course of three days.

CONDITIONS IN GREAT BRITAIN

External trade figures for July show total exports at £34,160,000 as compared with £32,599,000 in the same month of 1932, and imports at £53,700,000 as against £51,921,000 in July, 1932. There is, thus, a distinct improvement in British external trade.

Prices are also on the up grade. The Board of Trade index number which is now on a 1930 base, was 85.6 in July as compared with 85.1 in June and 83.1 in May. An important event of the month was the Canadian loan of £15,000,000 sterling. This issue is now being traded in at a premium.

DOMINION BUREAU OF STATISTICS, OTTAWA, August 21, 1933.

Table 1. Weighted Indexes of the Physical Volume of Business and Agricultural Factors in Canada, Based on the Monthly average for 1926 and Corrected where Necessary for Seasonal Variation.

Classification	1933						1933

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. VIII

OTTAWA, AOÛT, 1933

N° 8

STATISTICIEN DU DOMINION: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.
CHEF DE LA SECTION DE LA STATISTIQUE GÉNÉRALE: S. A. CUDMORE, M.A., F.S.S.
ADJOINT (STATISTIQUES ÉCONOMIQUES): S. B. SMITH, M.A.

STATISTIQUE COURANTE DES AFFAIRES AU CANADA

L'amélioration des conditions économiques au Canada constatée au cours du deuxième trimestre de l'année en cours s'est continuée pendant la première quinzaine du mois de juillet, les facteurs majeurs étant favorables comparativement au mois précédent. Le gain des affaires et la hausse des denrées ont contribué beaucoup au relèvement général.

En dépit du fléchissement des denrées spéculatives au cours de la seconde quinzaine de juillet, l'indice officiel du mois dépasse de plus de 4 p.c. celui de juin. Sauf le groupe fer et acier, on enregistre des gains pour les autres huit groupes. Ce sont les cotes des céréales qui ont subi les fluctuations les plus violentes, l'indice des substances végétales étant de 69.8 contre 61.7. Pour le blé, la moyenne est de 83.4 cents le boisseau, comparativement à 66.8 le mois précédent; quant à l'avoine, elle est de 39.7 cents contre 29.0.

L'indice des actions ordinaires est monté de 74.7 qu'il était en juin à 83.3. En dépit de la réaction vers la fin du mois, la moyenne de juillet est plus élevée sur toute la ligne. L'indice des titres miniers est de 106.9, contre 104.1 en juin, les titres or, cuivre et argent ayant monté modérément. Le maximum a été atteint la semaine terminée le 20 juillet et a été suivi de réactions les semaines terminées le 27 juillet et le 3 août.

Les obligations de tout repos se sont maintenues fermes, le rendement des obligations ontariennes étant de 4.63 p.c. contre 4.65 en juin. Les obligations du Dominion n'ont subi que très peu de changement.

Les prêts courants accusent un accroissement pour la fin de juin; la tendance des trois dernières années se trouve donc renversée cette fois-ci. Les dépôts à vue ont augmenté beaucoup, alors que les dépôts à terme ont diminué un peu. L'excédent de ces derniers sur les prêts courants est de \$487,000,000, le rapport des prêts courants aux dépôts à terme étant de 64.9 p.c. Les valeurs en portefeuille se chiffrent par \$860,000,000 contre \$836,000,000 à la fin de mai; ce chiffre constitue un nouveau record.

Opérations commerciales

L'amélioration prononcée constatée les quatre mois précédents s'est continuée en juillet également, l'industrie de l'acier, l'industrie du bois, le bâtiment et l'industrie électrique montrant une plus grande activité; quant au commerce étranger l'amélioration est substantielle. L'indice du volume physique des affaires est de 84.1 contre 82.2 le mois précédent.

Les indicateurs illustrant la tendance de la production minière sont réactionnaires. Bien que les exportations de nickel se tiennent toujours à un niveau élevé, elles accusent un léger fléchissement après ajustement saisonnier, le total étant de 10,501,100 lb contre 10,503,500 en juin. Les exportations de minerai de cuivre et de cuivre ampoule ont diminué. Quant au zinc, elles se montent à 10,970,300 lb. comparativement à 16,819,900. Les arrivages d'or à la Monnaie en provenance des mines canadiennes s'élèvent à 185,599 onces, contre 210,796, alors que les exportations sont de 147,621 onces comparativement à 175,179 en juin. Les expéditions d'argent ont baissé de 1,136,000 onces à 936,609 et les exportations d'amiante de qualité supérieure, de 12,134 tonnes à 6,259. Les importations de bauxite destinée à la fabrication de l'aluminium se montent à 4,799,600 lb contre 11,964,600 lb.

L'indice de la production minière est de 78.3 en juillet comparativement à 95.0 le mois précédent.

La production de farine de blé accuse une diminution inférieure à la normale pour la saison; le dernier mois sur lequel existent des données, elle se monte à 1,186,000 barils. L'accroissement de production d'avoine roulée est inférieur à la normale; pour la farine d'avoine et la farine de maïs, on constate des diminutions. La production de sucre s'élève à 57,332,000 lb contre 89,354,000 le mois précédent. On enregistre des augmentations pour ce qui est de l'abatage de bêtes à cornes et de porcs, les totaux respectifs en juillet étant de 88,135 et 191,464 têtes, tandis que les abatages de moutons et d'agneaux n'ont pas augmenté comme d'ordinaire. Les exportations de fromage et de conserves de saumon accusent une diminution prononcée après ajustement saisonnier, l'accroissement pour le fromage étant bien inférieur à la normale.

L'indice des dédouanements de tabac est de 120.9 contre 131.5. Bien que les dédouanements de cigarettes aient augmenté de 437,535,000 à 449,785,000, l'accroissement pour la saison est inférieur à la normale. On constate une augmentation pour les cigares, mais une diminution pour le tabac en feuille. Les importations de caoutchouc brut se montent à 2,670,000 lb, comparativement à 3,328,000 lb. L'industrie de la chaussure est très active, la production du dernier mois pour lequel existent des données atteignant 1,784,000 paires.

Les importations de coton brut se chiffrent par 9,790,000 lb contre 7,440,000 lb, augmentation de 36.5 p.c. après ajustement saisonnier. Celles des fils de coton ont également augmenté, tandis que celles de laine brute et de fils de laine ont diminué. Les industries du papier et du bois d'œuvre enregistrent des gains importants, la production de papier à journal ayant monté de 171,419 tonnes à 180,387. Les exportations de pulpe de bois se montent à 130,211,200 lb contre 104,340,800. L'activité accrue dans l'industrie du bois d'œuvre se reflète dans les exportations de planches et madriers qui ont augmenté de 94,700,000 pieds à 116,179,000. Les exportations de bardeaux ont également augmenté. L'indice du groupe bois et papier est de 87.0 comparativement à 79.2.

La sidérurgie a également été plus active, la production d'acier ayant augmenté de 31,602 tonnes à 49,076 et la production de fonte de 857 tonnes à 31,689. La production de voitures-automobiles a diminué moins que normalement, étant de 6,540 unités contre 7,323. Les importations de pétrole brut se montent à 118,271,000 gallons, contre 121,121,000 en juin. Dans ce cas aussi, la diminution est inférieure à la normale, l'indice ajusté étant de 219.0 contre 186.5.

En ce qui concerne le bâtiment, on constate un gain d'activité en juillet. Des contrats pour une valeur de \$12,651,600 ont été adjugés au cours du mois, contre \$8,086,200 le mois précédent. Les permis de bâtir émis dans 61 cités accusent toutefois une diminution, les totaux respectifs s'élevant à \$2,082,000 et \$3,536,000.

La production quotidienne d'énergie électrique est de 46,537,000 kw-h contre 45,697,000; les accroissements dans les provinces de Québec et d'Ontario étant substantiels. L'indice de l'énergie électrique a monté de 149.0 qu'il était au mois de juin à 161.5. Les chargements ferroviaires ont diminué plus que normalement pour la saison, les totaux respectifs se chiffrant par 162,728 et 175,954 wagons.

Contrairement aux tendances saisonnières, le commerce extérieur a été plus actif, les exportations étant de \$51,866,000 contre \$46,472,000.

Le chiffre plus élevé des débits bancaires est attribuable notamment à l'accélération des activités spéculatives à Toronto et Winnipeg, les chiffres respectifs étant de \$3,528,000,000 et \$2,982,000,000.

L'écoulement de la récolte calculé sur les arrivages de grain à la tête des lacs et aux ports du Pacifique accuse un ralentissement sur le mois de juin, l'indice étant de 148.5 contre 252.5. L'indice des entreposages est de 114.2 le 1er août, comparativement à 114.5 le 1er juillet.

Trois facteurs représentatifs

L'amélioration qui s'est fait sentir pendant le second trimestre de l'année a continué en juillet. Les opérations commerciales ont été plus actives que le mois précédent, l'indice du volume physique ayant monté de plus de 2 p.c. L'indice commercial n'est qu'à 2.99 fois au-dessous de la déviation standardisée de la ligne de tendance à long terme, contre 3.35 fois en juin. En dépit

de la reprise substantielle des opérations au cours des derniers quatre mois, le niveau actuel demeure bien au-dessous de la normale. La hausse des actions ordinaires d'avril à juillet est des plus prononcées et indique que les spéculateurs reprennent confiance. L'indice équivaut à 1.88 fois la déviation standardisée au-dessous de la ligne de tendance à long terme, contre 2.90 fois en mars et 2.13 fois en juin. Les cours des fonds d'Etat demeurent fermes.

Tendance de la production au cours de l'après-guerre

La tendance de la production à partir de 1919 jusqu'à nos jours est illustrée par le graphique de la page 10. Il va sans dire que la production des matières premières est assujettie à des oscillations plus violentes que celle des denrées destinées à la consommation directe. Cette divergence a été des plus prononcée au cours des derniers trente mois. En ce qui concerne les denrées destinées à la consommation, le niveau le plus bas fut atteint en février et pour les matières premières en avril. Bien que la production des premières accuse un fléchissement important sur le maximum de 1929, le déclin a été de beaucoup plus considérable pour les secondes, dont la production au cours des premiers quatre mois de 1933 a été inférieure à celle de toute autre période correspondante de l'après-guerre.

La stagnation dans la production des marchandises non périssables constitue le facteur principal de la crise, et la reprise continue des activités d'industries telles que celles du bois, du fer et de l'acier et du bâtiment contribue énormément à l'amélioration de la situation économique.

Production industrielle des principaux pays

Le graphique de la page 15 se rapporte à la production industrielle de cinq pays importants. Bien qu'il s'agisse d'indices officiels, ils ont été recalculés sur la base de 1928 par la Société des Nations. L'indice composite relatif aux cinq pays indique une amélioration notable depuis le mois de juillet 1932, mois du bas-fond de la crise. Dans la plupart des grands pays industriels, les activités ont repris depuis un an. La production industrielle de la France monte depuis juillet 1932, tandis qu'en Allemagne le niveau le plus bas fut atteint un mois après. Quant aux États-Unis les niveaux les plus bas de 1932 et 1933 furent atteints en juillet et mars respectivement. L'accroissement en juin est de 53.3 p.c. sur juillet 1932 et de 48 p.c. sur mars 1933. Le minimum pour le Canada a été atteint en février de l'année courante, des gains consécutifs et substantiels étant constatés jusqu'au dernier mois pour lequel des statistiques ont été compilées.

La crise et les débuts de l'amélioration se sont développés de façon pas mal analogue dans les cinq pays, notwithstanding la grande divergence entre leurs méthodes.

Rapport entre les éléments économiques

Les cinq éléments économiques illustrant la situation au Canada telle qu'elle était chaque mois à partir de 1926 font l'objet du graphique de la page 30. Le rapport du volume physique des affaires aux prix de gros occupe un rang prépondérant. Le niveau le plus bas, pour chacun de ces deux éléments a été atteint cette année au mois de février. Toutefois, on constate depuis une amélioration prononcée, indication que la situation économique s'améliore. Entre les mois de février et de juillet, l'indice des affaires s'est amélioré de 25.5 p.c. et celui des prix, de 11 p.c.

Quant au commerce extérieur, c'est au mois d'avril qu'il a baissé le plus. Même en tenant compte de l'ajustement saisonnier, c'est le pire mois depuis quelques années. Les importations effectuées au cours de ce mois dépassaient légèrement les exportations, mais l'accroissement des exportations ayant depuis lors dépassé celui des importations, un excédent des exportations marque l'exercice financier en cours.

La somme des dépôts à terme se maintient à un niveau plus élevé que l'année passée, le total à la fin de juin se chiffant par \$1,387,000,000. La tendance des prêts courants, qui était à la baisse les premiers cinq mois de l'année, accuse un léger gain au mois de juin. L'excédent des dépôts à terme sur les prêts courants est de \$487,000,000 au 30 juin, soit 64.9 p.c.

En raison, notamment, de l'accroissement des dépôts à vue, la somme des deux principales catégories de dépôts accuse une légère augmentation sur le premier semestre de l'année passée. A partir du mois de mai de l'année en cours, les débits aux comptes individuels ont augmenté d'une façon prononcée, ce qui est attribuable, dans une large mesure, à la reprise des activités spéculatives. Le total de juillet se monte à \$3,528,000,000, les paiements effectués au moyen de chèques n'ayant jamais été plus élevés depuis le mois d'octobre 1930.

Après avoir atteint un maximum temporaire vers le milieu de 1931, les cours des obligations de tout repos avaient subi des fléchissements prononcés pendant les six mois suivants, atteignant le plus bas niveau en janvier 1932, mais depuis lors ils se sont relevés graduellement. La hausse des actions ordinaires survenue entre avril et juillet avait toutefois contrebalancé les baisses constatées depuis le mois de mai. Prenant 1926 pour base (100), l'indice des actions ordinaires a été plus élevé que celui des obligations à partir de la fin de 1926 jusqu'au mois de mars 1931, mais depuis, la situation est renversée.

La situation aux Etats-Unis

En dépit de la réaction économique survenue vers la mi-juillet, les opérations commerciales aux Etats-Unis ont été plus actives en juillet qu'en juin. Le gain est attribuable à la reprise continue de l'activité industrielle au cours de la première quinzaine du mois de juillet. Mais pour la seconde quinzaine, on constate non seulement un arrêt mais aussi un ralentissement prononcé çà et là. La production d'acier en lingots a augmenté de près de 28 p.c. en juillet, le taux estimatif du rendement étant plus élevé que celui de tout autre mois depuis trois ans. La production quotidienne de fonte a augmenté de 42,000 tonnes en juin à presque 59,000 tonnes en juillet. La production de zinc atteint 30,905 tonnes, contre 24,027, et les stocks ont baissé d'environ 12 p.c. On a adjugé des contrats de construction pour une somme de \$82,700,000, comparativement à \$103,000,000 le mois précédent. Les chargements ferroviaires se montent à 3,109,000 wagons, contre 2,265,000; toutes les catégories de transports accusent un accroissement, sauf ceux du bétail; on constate les plus forts accroissements pour les catégories suivantes: houille, céréales, minerai et divers. La production d'énergie électrique accuse une augmentation de 4 p.c. sur le mois précédent.

Les prix de gros sont, en moyenne, plus élevés qu'en juin, mais la baisse prononcée survenue vers la fin du mois a presque contrebalancé les hausses précédentes. Mentionnons parmi les catégories qui ont continué de monter: le pétrole, la gasoline, le cuivre, le plomb, le zinc, la fonte, l'acier marchand, la mitraille d'acier, les peaux et la laine. La hausse des titres durant la première quinzaine du mois a été suivie d'une violente réaction causant une baisse moyenne de 21 p.c. environ en trois jours.

La situation en Grande-Bretagne

Les exportations du mois de juillet se montent à £34,160,000, contre £32,599,000 le mois correspondant de l'année passée. Quant aux importations, elles se chiffrent par £53,700,000 et £51,921,000 respectivement. On constate donc une amélioration notable sous ce rapport.

Les prix sont à la hausse. L'indice du Board of Trade (base actuelle 1930) est de 85.6 en juillet contre 85.1 en juin et 83.1 en mai. Le lancement de l'emprunt canadien de £15,000,000 est un des grands événements du mois. Cette émission fait prime actuellement.

OTTAWA, BUREAU FÉDÉRAL DE LA STATISTIQUE, 21 août 1933.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

1. ANNUAL OR SPECIAL REPORTS ISSUED DURING THE MONTH ENDED AUGUST 16, 1933

Administration.—List of publications including reports, bulletins, press releases, etc. 1933.

Population.—Seventh census of Canada, 1931, bulletin No. 32: Literacy language spoken and conjugal condition of the population ten years of age and over.
